

LISTENING TO WHAT MATTERS MOST

BUILDING CAPACITY FOR PATIENT-CENTERED CLINICAL EFFECTIVENESS RESEARCH IN STROKE-RELATED APHASIA

We're working with people who have aphasia, their loved ones, healthcare professionals, and researchers to make a list of the most important ways aphasia impacts everyday life. This list will help improve research, care, and support—so it's focused on what matters most to people with aphasia.

WHO?

For this project, we are recruiting:

- People with aphasia after a stroke
- Loved ones of people with aphasia
- Researchers in the area of aphasia
- Health care professionals who work with people with aphasia

WHAT?

Develop a list of core impacts of living with aphasia to guide future research and programming

COMMITMENT

- Participate in up to
 - 2 online surveys
 - 2 online meetings
- Approximately 6 hours of time
- Occurs between Jan 2026 and August 2026
- Payment: \$200

CONTACTS
