

VOLUNTEER FOR A RESEARCH STUDY ON AI CHATBOTS AND APHASIA!

We are looking for people with post-stroke aphasia to participate in a study evaluating the use of an AI chatbot to provide accessible health information.

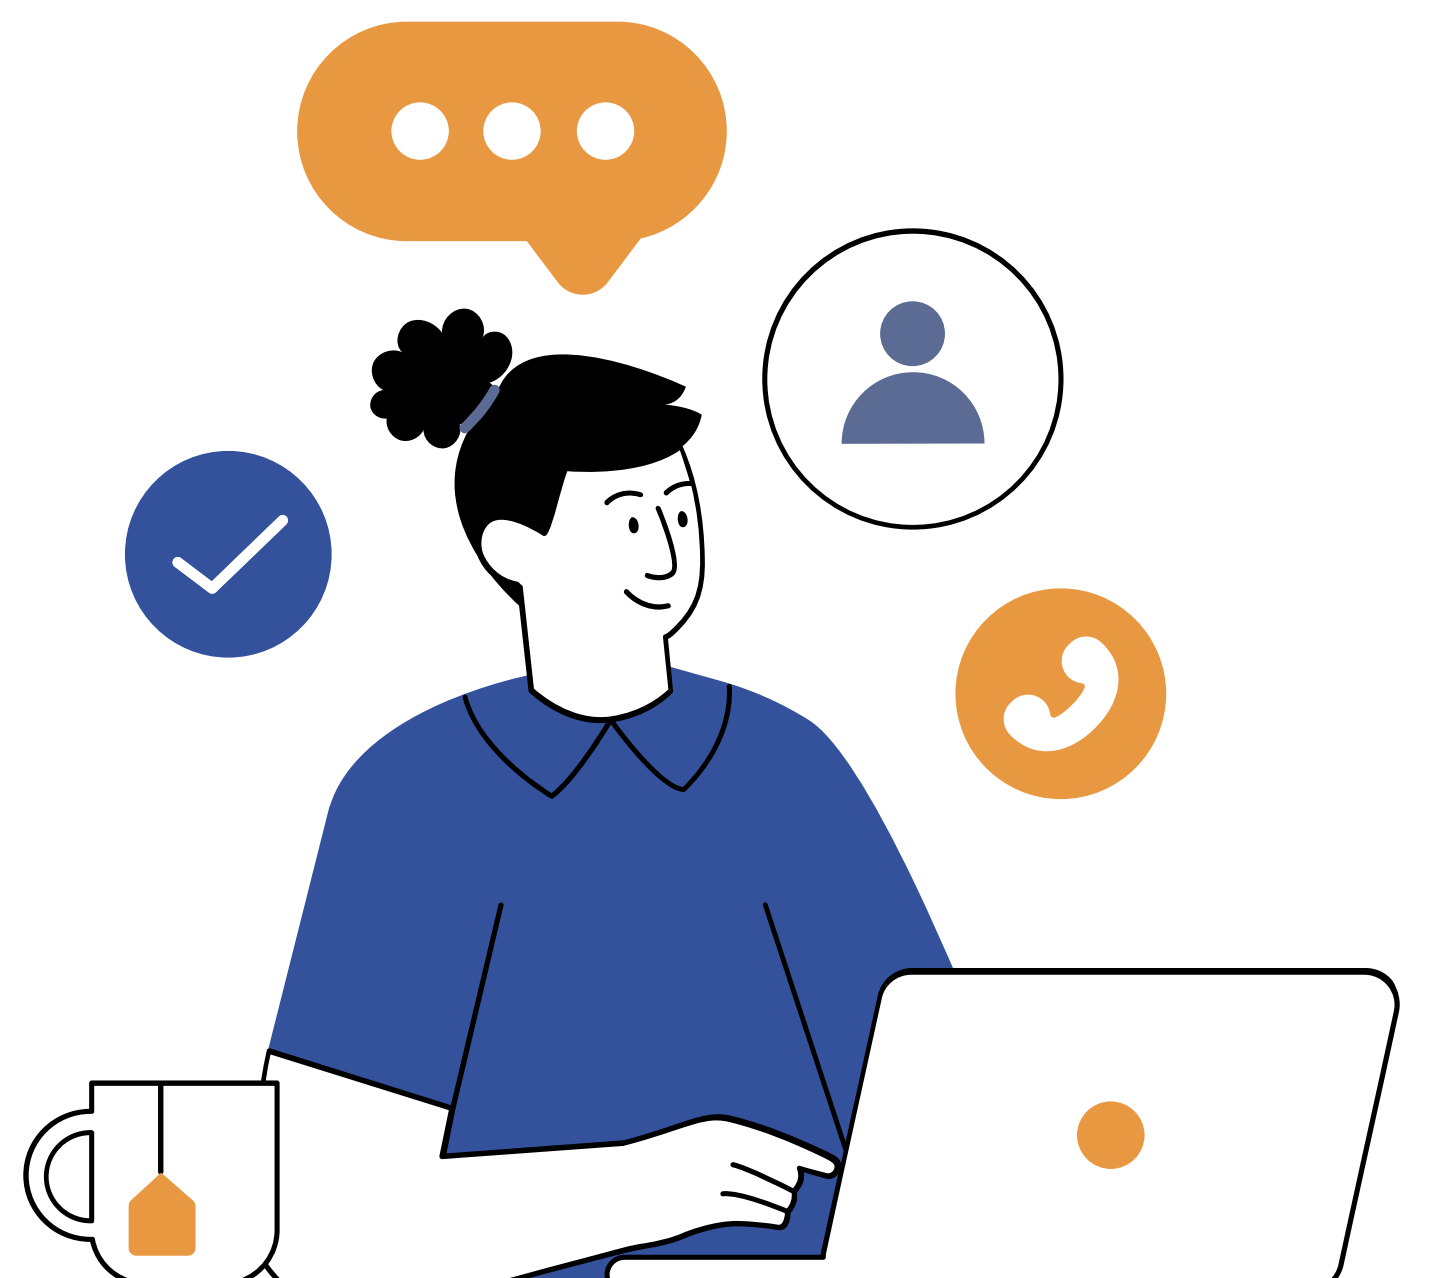

You may be eligible if you:

- Have aphasia caused by a stroke
- Are 6 months or more post-stroke
- Are a fluent English speaker

Participants will be asked to:

- Use traditional websites to find health information
- Use an AI chatbot to obtain similar information
- Answer questions about your experience
- Complete questionnaires and/or assessments

The study lasts 1-2 sessions, 75-100 minutes total
