

[Local Address]

To whom it may concern,

I am currently enrolled as \_\_\_\_\_ at \_\_\_\_\_ University. As a current student and psychology major, I became interested in your program and am hoping to secure a position in your lab for the school year of \_\_\_\_\_.

Previously, I have conducted research through the \_\_\_\_\_ where I was involved in the \_\_\_\_\_ Lab and worked directly with Dr. \_\_\_\_\_. Through this lab, I was exposed to various research projects exploring \_\_\_\_\_. Specifically, I focused on \_\_\_\_\_ [*add responsibilities*]. With my involvement in these studies, I gained valuable skills regarding the research process and clinical interactions that I hope to further continue.

Last semester, I took a class in Developmental Psychology and through the coursework became curious about \_\_\_\_\_. My goals for the school year include further learning the specifics of \_\_\_\_\_, exploring possible careers in psychology in relation to children, and gaining more experience in a lab setting. I feel as if the \_\_\_\_\_ lab is a perfect opportunity for me to achieve my goals and further explore my interest in cognitive development.

Thank you for your consideration,
