Center on Health Services Training and Research

The Center on Health Services Training and Research (CoHSTAR) strives to increase physical therapy health services research capacity.

CoHSTAR offers postdoctoral fellowships, hosts visiting scientists, and provides special summer training sessions. The center will also fund several pilot studies each year from investigators inside and outside the program.

Check out our website for more information!

Funded by...

The Center on Health Services Training and Research (CoHSTAR) is a multi-institutional center dedicated to advancing health services and health policy research in physical therapy.

Center on Health Services Training and Research

Request for Applications

We are funding pilot studies in areas related to physical therapy health services research. The pilot studies may be designed to provide preliminary data that will support larger subsequent funding efforts, or develop infrastructure (new instruments, data registries, etc.) needed to pursue physical therapy health services research questions. The amount of funding will be approximately \$25,000.00 total cost per project. Only direct costs are covered by this program.

Letters of intent are due July 15th.

Submit the LOI in PDF format to Kelley Fitzgerald (kfitzger@pitt.edu) no later than 5:00pm on July 15, 2015. *Application guidelines are listed on the CoHSTAR website.*

Apply now!

CoHSTAR builds upon the well-established, interdisciplinary, intellectually rigorous and nationally renowned health services research and training infrastructure available at its trio of collaborating institutions.

- **The Research Career Training Program Core** is located at Brown University
- **The Pilot Studies Core** is located at the University of Pittsburgh
- **The Evaluation and Dissemination Core** is located at Boston University

BROWN

CoHSTAR strives to increase physical therapy health services research capacity by:

- Building health services research infrastructure
- Expanding the number of PT health services researchers
- Increasing the quantity and quality of PT health services research
- Building upon active and growing research programs at collaborating institutions

Are you a physical therapist about to graduate from a doctoral program?

We want YOU!

Full time, postdoctoral fellowship trainee opportunities (1 or 2 year) are available at the three participating institutions.* *Application guidelines are listed on the CoHSTAR Website.*

Benefits

- Didactic training
- Travel support
- Information resources
- Technical support
- Health benefits, vacation days and sick days
- Annual stipend of \$55,000/per fellow (inflated annually)

Specialization

- Analysis of large data sets (Brown University)
- Implementation science and quality assurance research (University of Pittsburgh)
- Rehabilitation outcome measurement (Boston University)
