

Data Structures with Java

MET CS 342 A1
Course Format - On Campus
Fall 2019

Vic Berry

vberry@bu.edu

Office hours: by appointment or after class

Class Time: Monday - 6:00 p.m. – 8:45 p.m.

Class Location: CGS 323

Course Description

This course is designed to familiarize and instruct students in the concepts of data structures, data abstraction, information hiding, and software interaction, as utilized in software engineering. The course will describe the concepts listed above and will demonstrate their usage in modern software engineering, with Java. An emphasis is placed on the implementation of these techniques and the management of their usage.

Class Format and Grading Policy Policies

New material will be presented in weekly lectures. Reviews, exercises, and homework solutions will be covered during lectures. Student participation is highly recommended, although not mandatory, and it is possible for participation to lead to extra credit.

Weekly (more or less) Homework problems will be assigned, in addition to 3 programming assignments. Homework will be assigned weekly and is due the following week. Late homework and programs will not be accepted unless permission by the instructor was granted prior to the due date. A mid-term and final exam will be completed in class, and the breakdown of grading for the course is as follows:

Boston University Metropolitan College

Homework: 15%

Programming Assignments: 45% (1st 10%, 2nd 15%, 3rd 20%)

Mid-term Exam:15%Final Exam:25%

This course is an intensive analysis of Software Engineering "tools". The student should be prepared to spend sufficient time and energy on this course to allow for successful completion of the course work.

The intent of this course is to allow the student to learn to build data structures, under no circumstances should (non-student created) already existing data structures be used in any assignments. No data structures from java.util.* should be used. Use of packages such as ArrayList, HashMap, etc. will result in failure of assignments.

Academic Conduct Code – Work handed in by students should be of that student's design. Discussion of approach to problems with other students is encouraged, but the actual work on a project should be of an individual nature. Cheating and plagiarism will not be tolerated in any Metropolitan College course. They will result in no credit for the assignment or examination and may lead to disciplinary actions. Please take the time to review the Student Academic Conduct Code:

http://www.bu.edu/met/metropolitan_college_people/student/resources/conduct/code.html.

Class Meetings, Lectures & Assignments

Lectures, Readings, and Assignments subject to change, and will be announced in class as applicable within a reasonable time frame.

Boston University Metropolitan College

(1) 9 Sep 19 Introduction, Administrative Issues. Software Design, Tools (Compilers, IDEs, etc.), Runtime analysis, Big O Notation, Tes Debugging. Java Review, Methods, expressions, control flow Classes, Packages, Parameters	
(Compilers, IDEs, etc.), Runtime analysis, Big O Notation, Tes Debugging. Java Review, Methods, expressions, control flow	st and
(2) 16 Sep 19 Collection Classes - Methods, Static vs. Dynamic objects,	Chapter 3
(3) 23 Sep 19 Linked Lists – Arrays, Bag Abstract Data Type, Nodes, Node and Linked List Tools	tools, Chapter 4
(4) 30 Sep 19 Generics – Wrapper Classes, and Autoboxing. Generic Class Generic Nodes, Interfaces, and Iterators	ses, Chapters 5
(5) 7 Oct 19 Stacks – Introduction, Applications, Abstract Data Types, Arrabased, Linked-list Based Stacks	y- Chapter 6
(6) 15 Oct 19 (TUESDAY) Queues – Introduction, Applications Abstract Dat Types. Linked Queue implementations, array-based queue implementations.	a Chapters 7
(7) 21 Oct 19 In Class Lab (Bring notebook computer). Review for Midterm.	
(8) 28 Oct 19 Midterm Exam	
(9) 4 Nov 19 Recursive Thinking - Examples, theory implementations of recursion.	Chapter 8
(10) 11 Nov 19 Trees – Binary Trees, Linked and Array based representation: Traversals, In-Order, Pre-Order, Post Order	s Chapters 9
(11) 18 Nov 19 Searching – Serial searching, Binary searching, Open Addres Hashing, Chained Hashing	s Chapter 11
(12) 25 Nov 19 Sorting – Quadratic Sorting Algorithms, Recursive Sorting Algorithms, Heaps	Chapter12
(13) 2 Dec 19 Graphs – Directed, and undirected Graphs, Dijkstra's Shortes Algorithm.	t Path Chapter14
