# QUICK START GUIDE: TRINETX

Introduction

TriNetX is a cloud-based informatics platform that allow users to analyze aggregate patient populations and facilitate clinical research, study design and clinical trial recruitment. Investigators at Boston Medical Center and Boston University have access to BMC's de-identified patient data through a self-service, user-friendly interface and state-of-the-art visualization and analytic functions.

URL for web browser: https://live.trinetx.com/

Logging into the User Interface

Log into the TriNetX user interface with your BMC email and click **Login**.

You will be re-directed to the BMC Active Directory log in page. Enter your BMC email and password.
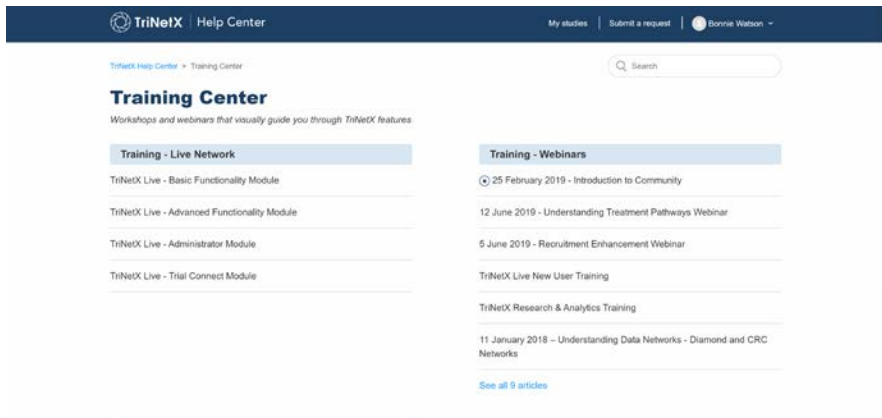

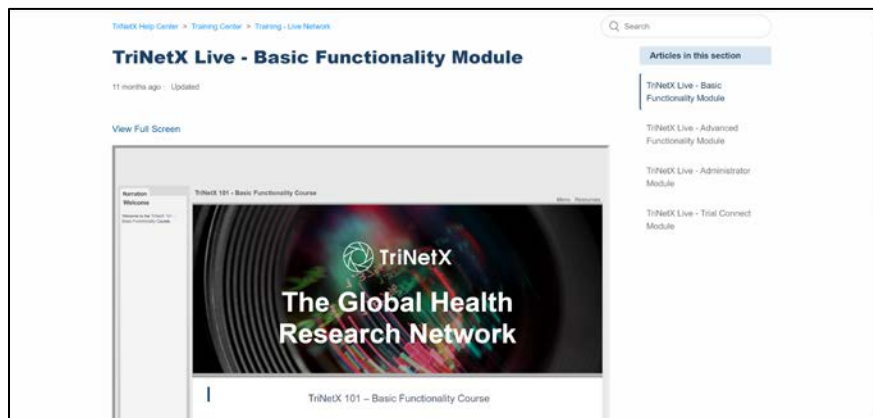

Viewing Training Videos

Select **Help** in the upper right-hand corner and scroll down to **Training Center**.

A new browser will open with a list of training options.

All general users should begin with the **Basic Functionality Module**.

The **Advanced Functionality Module** is also recommended. After viewing the training modules, users can begin performing queries using the **Query Builder**.

Need more help?

Explore the **Frequently Asked Questions** and **Resources** sections under the **Help Menu** for more information.
