

Boston University Disability & Access Services

Accommodated Housing (ESA) – Provider Psychiatric Disability Verification Form

Boston University is deeply committed to the full participation of students with disabilities in all aspects of University life. We believe that living on campus, learning to live in a community and sharing a space with others is an integral part of students' educational experience. We strive to meet the needs of students with documented disabilities in accordance with applicable federal and state laws.

Students with a significant documented disability (or disabilities), including temporary injuries, impacting their residential environment must seek accommodations or modifications through the housing accommodation request process administered by BU Disability & Access Services (DAS). A disability is a physical or mental impairment that substantially limits one or more major life activities. A temporary impairment may include a disabling injury, severe illness, recovery from surgery, adjustment disorders, and/or a condition caused by a traumatic event.

DAS provides accommodations and services to students with psychiatric disabilities. Students with psychiatric disabilities may request to have an Emotional Support Animal (ESA) reside with them in University housing as an exception to the University's policy prohibiting animals in University housing units. An ESA is an animal, not just a dog, which provides specific emotional support and comfort for a student with a diagnosed psychiatric disability, thereby enabling the student to live and participate in BU programs and activities. The support provided by an ESA mitigates psychiatric symptoms and is normally part of a larger treatment plan.

DAS recognizes that having an ESA while living in a University residence hall may be necessary for some students with significant psychiatric conditions. Due to the practical limitations of BU Housing, DAS requires careful consideration of the impact of the request on both the student and the campus community. Therefore, students seeking an ESA as an accommodation in their residential environment must provide appropriate documentation of their psychiatric disability. Based on this documentation and an in-person interview with the student, DAS will evaluate the student's eligibility for this and other accommodations on a case-by-case basis.

To verify the student's psychiatric disability and its severity, DAS requires the student to ensure that this completed **Provider Psychiatric Disability Verification Form** is submitted by their physician or other approved specialist with experience and expertise in the area related to the student's disability. The completed **Form** should address the following in detail:

- A current clear statement of disability including diagnosis and DSM-5 or ICD Diagnosis (text and code) and information concerning co-morbidity
- Documentation must be current, not more than one year old. In some cases, documentation may need to be provided every six months, depending on the fluid or static state of their disability.
- **Current Functional Limitations:** Information concerning the **impact** of the disability on **major life activities** as well as the **functional limitations** and how they currently interfere in the **residential** setting. Again, factors to consider include the severity, duration, and pervasiveness of symptoms.
- Suggested accommodations to address each limitation as well as history of accommodations used.
- The diagnostic report must include the *name*, and title, and license number of the evaluator.
- The evaluation and documentation much have been conducted by a licensed psychiatrist, neuropsychologist or other qualified and licensed mental health or medical professional.
- The more detail you provide us, the better equipped we will be to determine and provide appropriate and timely reasonable accommodations.
- Please fill out all of the questions on the below form, even if you include a separate evaluation and/or clinical summary.

Please note: DAS will not begin to review a student's ESA accommodation request until this **Form** is received. Also, please be aware that provision of accommodations in high school, other non-BU academic institution or on any standardized test does not guarantee that the same or any accommodations will be awarded at Boston University.
