CHARTING NEW HORIZONS: THE MAST PROGRAM'S IMPACT ON EXPERIENTIAL LEARNING IN SOFTWARE ENGINEERING

Will Tomlinson, Ph.D.,
Director, Software & Application Innovation Lab (SAIL)

BE INSPIRED BY NEW IDEAS.

OVERVIEW: MICROSERVICES AND SOFTWARE TOOLS (MAST) PROGRAM

“...students will have opportunities to learn and apply industry-leading software development practices to build open-source microservices and software tools and integrate them into a host of applications that are already under development at SAIL.”

**Students working
on real-world
projects**

**Professional
mentorship by
technical staff**

**Helping students
accomplish
personal goals**

**Measuring the
impact to student
development**

BENEFITS OF THE MAST PROGRAM

Prepare students for career success

Enhance organization productivity

Increase opportunities for mentorship

Enable domain-research at BU

Instantiate a BU-specific recruitment pipeline

Partner with student-centric orgs

MEASURING STUDENT IMPACT: WHAT WE MEASURE AND HOW

Interests and Opportunity

Measurement Methods:

1. Mixed Methods Survey (qual and quant)
2. Pre and Post-Project Reflection Questions
3. Cadenced check-ins with SAIL staff for qualitative feedback

RECAP: THE MAST PROGRAM YEAR 1
