

Charcoal Canisters

Record on Canister:

- Initial weight
- Dates of use
- Weight of canister before each use

Discard Canister as Hazardous Chemical Waste:

- When weight gain reaches manufacturer's limit
- Weight gain indicates that the canister has reached its maximum absorbent capacity
- Example: F/Air and VetEquip canisters must be discarded when they have gained **50g** more than their initial weight

(Anesthetic Gases Training must be completed annually on BioRAFT)
