

### Dosimeter Placement: **NOT** Wearing Lead

Please check the marking on your dosimetry badge. Badges marked "collar" should be worn **over** the lead apron, at or near neck level. Badges marked "torso" or "fetal" should be worn **under** the lead apron, at chest or waist level.

Collar badges are meant for staff who are in the room during fluoroscopy procedures on a regular basis. All others should have torso badges. If you believe you have the wrong badge designation, please contact **Radiation Safety at 617-358-7688**.
