

BOSTON UNIVERSITY RESEARCH
Laboratory Cleaning/Disinfection Log

This is a tool for laboratory staff to document cleaning and disinfection in laboratories to help reduce the risk of COVID-19 transmission through contaminated surfaces. High-touch surfaces and laboratory equipment are to be cleaned/disinfected daily when the laboratory is in use.

Current guidance recommends regular cleaning and disinfection of high-touch surfaces, including tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, faucets, sinks, commonly-used laboratory equipment, etc. Disinfect all equipment and surfaces with an EPA-registered disinfectant wipe or spray.

Equipment: List specific equipment to be disinfected daily.
