

BE 468: Fall 2020
Clinical Applications of Biomedical Design

Instructor: Professor Klapperich, catherin@bu.edu, secure cathie.klapperich@protonmail.com

When: Tuesdays and Thursdays 3:30pm -5:15 pm

In person location: PHOTONICS 117 (*note this is not the classroom assigned online*)

Pods: Class will be divided up into three learning pods. Even if you are not going to be on campus, please sign up for a pod and make a note that you will be attending class only online. We will use these pods for other group activities in addition to determining who is in person in class on a given day. You can sign up for pods here: <https://docs.google.com/spreadsheets/d/1Ra6MkLUSiWubxHEkLpLrL00-5mPM5iw7o9peiEKpJwM/edit?usp=sharing>

Pods are limited to 27 people. I will lock in the pods after class on 9/3/20. Pods are to keep us distanced and minimize the number of people who come into contact with each other, so switching pods will not be possible after the first day of class. **Masks:** required at all times. Class will be cancelled immediately for the day if anyone comes without a mask. (If you need one, please reach out to me directly, I can provide masks.)

Syllabus: Since the syllabus is still evolving, and to avoid confusion, here is the syllabus for the first 5 classes. We will discuss all the possibilities/changes/your preferences on 9/3.

Slack: please join the class slack. We will be using this in addition to Blackboard for real time communication https://join.slack.com/t/be468fall2020/shared_invite/zt-gwhv9g3g-zcRkNcGypkilb_WueLM3eg

Blackboard Site: https://learn.bu.edu/ultra/courses/_67939_1/cl/outline
