

## TEAM 32 - VETCON BADGE

Julian Pagett, Derek Barbosa, John Kircher, Carlos Ortiz, Ryan Sullivan  
Client: VETCON - Michael R. Jones

### Abstract

Our clients, VETCON, need a unique, functional, and production-ready badge for DefCon 30 which will take place in August 2022. Our team will be creating the prototype along with a bill of materials needed to produce each badge, a user manual for assembly and operation of the badge, as well as a mass badge production process. Our team will use the TI MSP430 microcontroller as a framework for the badge. We will create custom hardware, software, and a distinct aesthetic appearance to create a unique user experience.
