GRADING

There will be two examinations as noted in the schedule. Each will cover approximately 1/2 of the course and will account for 30% (each) of the total grade.

There will be approximately 10 homework assignments (10%) handed out in class. These will be due in class on the due date stated on the assignment. Late submissions will not be graded.

A comprehensive safety training session will be conducted on the first week of laboratory classes and all students are required to attend this session before being allowed to conduct experiments. Five scheduled laboratory experiments will be conducted Laboratory reports are due at the next scheduled laboratory session, except for the last one (see schedule). Late reports will not be graded. The total laboratory grades will account for 10% of the final grade. There will be 3-4 unscheduled quizzes on subject matter covered that week. The quizzes will account for 5% of the total grade.

A group project (3/4 people) will account for the remaining 15% of the final grade. A pre-proposal, outlining the design of your experimental work and the objective of your project, needs to be submitted before you can begin project related experiments. An intermediate project report (Introduction, including a detailed Literature Review, and Experimental Design) are due prior to the final report submission as detailed in the laboratory schedule. The group project will require a final oral presentation and submission of a typed final report.

Grading Summary:

First Exam	35 %
Second Exam	35 %
Homework/Lab	15 %
Project	15 %
