Instructors

• Guy Thompson II | gthom2@bu.edu | Sections A2, A4

Web Resources

• ME359 Blackboard site

Prerequisites (Recommended)

• EK156 Design and Manufacture

Course Schedule

- Lecture: EMB 125 (ECL)
 - A2: Tues 6-8p
 - A4: Wed 6-8p
- Lab: EMB 125 (ECL)
 - o Arranged

Course Text

- Required
 - o *Machinery's Handbook* from Industrial Press: Any edition from 24th to current; hardcopy

Learning Objectives

Technical drawing in two and three dimensions will be covered in detail using the computer aided design tool Creo. Geometrical dimensioning and tolerancing methods and specifications will be taught and applied to a variety of tasks and projects.

Topics will include initial aspects of machine components and design and relations to machining and various manufacturing processes.

Often, specific key machine components will be used as demonstrations of dimensioning and tolerancing specifications.

Grading

- Homeworks 60%
- Quizzes (2) 20%
- Final Project 20%
- It is your responsibility to check with the instructor or GTF to make sure that all quizzes and assignments have been recorded correctly, and that you are not missing any points on the grade sheet on Blackboard. After two weeks from the time the assignment is returned there will be no change in grades.

Homework

- Weight
 - All homeworks are weighted equally
- Frequency
 - o Weekly
- Collaboration Policy
 - Collaboration is acceptable, but the final work must be the student's own. The students must note with whom they have collaborated

Lecture Schedule

This schedule is a general outline for the class, the exact dates and classes may vary.

Class No.	Lecture Topic	CAD Demo
1	 Introduction History of CAD Parts Drawings, Part I 	- Basic CAD - Drawings Part I
2	- Part Drawings II	- Basic CAD II - Drawings II
3	- Part Drawings III	- Basic CAD III - Drawings III
4	Machine Elements I - Cams - Shafts - Bearings - Retaining Rings - Springs - O-Rings	
5	Machine Elements II - Gears - Splines - Belts	
6	 Tolerances Tolerance Stacks Surface Finish Geometric Dimensioning and Tolerancing 	- Applying Tolerances, Surface Finish to Models and Drawings
7	 Assembly Drawings Bill of Materials Methods of Joining 	 Assembly Models and Drawings BOMs Downloading models from online sites and 3D ContentCentral
8	Quiz 1 Up to Class 6	
9	Methods of Manufacture	 Sheetmetal Sheetmetal Drawings Features for molded/cast parts Weldment Models/Drawings
10	FEA	- Simulation demo
11	- Industrial Design - Rapid Prototyping	
12	Project Presentations and Reports due	
13	Quiz 2 Class 6 on
