

Electroconvulsive Therapy: Family Experiences Study

Do you have a family member
who has had electroconvulsive
therapy?

We would like to hear about your
experiences!

Participants will be interviewed about their experience and fill out some brief questionnaires.

Interviews will take ~ 1 hour and will take place at 900 Commonwealth Avenue, or at a private location in the community.

Participants will receive their choice of a \$25 Target or Amazon gift card for completing the study.

Participants must be over 18 years of age.

Our goal in this study is to understand family's experiences in order to eventually develop programs to better support families whose members are receiving ECT.
