

WELCOME TO GREATER ROSLINDALE MEDICAL AND DENTAL CENTER

As a patient in a primary care practice at Greater Roslindale Medical and Dental Center, you have a medical home. Your primary care team in your medical home will provide you with the care you need—coordinating all of your health care, from helping you stay healthy by reminding you of preventive checkups and tests to working with you to manage chronic conditions, visits to specialists, hospital admissions and more. The care you receive is based upon evidence-based guidelines and national quality standards. Through your medical home, you'll be sure to receive the care you want and need.

How Your Medical Home Can Help You

Your health care team at GRMDC will partner with you to help you live a healthier life. Through your medical home, you'll receive:

- Personalized care, because your health care providers know you and your health history.
- Help in navigating the health care system so you get the care you need when you need it—from us or other health care providers
- Care that is coordinated seamlessly between your doctor, specialists and hospitals
- Better access to care through your medical home's extended practice hours and 24-hour health care provider coverage for office calls
- An expanded range of care supported by the latest knowledge and technology

Your Role as a Patient in Your Medical Home

As a patient at Greater Roslindale Medical and Dental Center, you are the most important member of your health care team. We encourage you to play an active role on your team. Here are some ways you can do that:

- Talk with your health care providers about all of your questions and concerns.
- Work with your care team to have any previous medical records transferred to GRMDC. Let your doctors know your complete medical history, including any care you receive outside the practice, so they know how to best care for you.

- Call us before you go to an emergency room or a hospital for care. If this isn't possible, please let us know as soon as you can.
- When you go to an emergency room or a hospital for care, tell them who your primary care provider (PCP) is and share information about the visit with your PCP.
- Take care of your health, and follow the self-care plan you and your health care team have worked out together.

Your Health Care Team's Role in Your Medical Home

Your health care team at GRMDC will work with you in partnership to make decisions to manage your health. Team members are committed to:

- Telling you about the range of evidence-based care options offered by the practice and community to support self-care
- Working with you to design a plan for your health and providing you with the education tools that will help you achieve your self-management goals
- Providing you with a safe environment to talk about your private concerns
- Answering your questions and concerns at each appointment, and helping you understand your health care needs
- Coordinating your health care in the practice and with health care providers outside of the practice

We're Here When You Need Us

For your convenience, your medical home at GRMDC offers extended office hours. 24-hour health care coverage is also available for all questions and health emergencies. Even when the office is closed, you can speak with a provider about your health care needs by calling our main office number.
