FRAMINGHAM HEART STUDY CODING MANUAL

Clinic Exam Data: Interview, Physical Exam, ECG

COHORT: Omni 1

TIME INTERVAL: Exam 3

DATASET NAME: e_exam_ex03_7_0426s

OBSERVATIONS: 298

Variables that define a unique record: SHAREID.

The following variables found in the clinic exam questionnaire have been excluded from this dataset. They are for administrative purposes only:
H410-H425 and H439-H454, Procedures Sheet
H747-H753, H755, H757-H768 and H771-H772, Referral Tracking
H429-H435 Exit Interview

The following variables found in the clinic exam questionnaire have been excluded from this dataset. They can be found in separate datasets:
H019-H023, Medications (use corresponding medication dataset)
H582-H603, Cognitive Function (use corresponding MMSE dataset)
H390 sex of patient and H391 age of patient (use the most recent dates dataset)

Variables H073, H076, H079, number of alcoholic drinks per month, have been converted to number of drinks per week: (number of drinks/month)/4 (H072,H075,H078). See annotated data collection form for details. After value conversions were made, H073,H076, H079 were dropped from the dataset.

See the accompanying protocol and annotated data collection form for additional information regarding the variables. The data collection form has a hierarchical pattern with regard to some questions. Refer to "e_exam_ex03_7_0426_annotated_form.pdf" file to get a full understanding of the hierarchical layout of questions and variables.

Throughout the coding manual there are variable level notes that identify related variables. In most cases, if first variable of the grouping is negative, and the variables following were not answered (due to skip pattern) then the variables following have been set to negative unless otherwise noted.

This dataset is a modified version of the original dataset. Some observations were deleted due to consent restrictions. This coding manual is based on the original dataset. Therefore the value ranges, number of observations and/or cohorts found in the modified dataset, may differ from those stated in this manual.
