

# Cancer Research Training Internships

CEESP Students and Mentors

## CANCER EPIDEMIOLOGY EDUCATION IN SPECIAL POPULATIONS (CEESP) PROGRAM

CEESP provides funding for students from all students of Schools of Public Health to travel and conduct summer research in U.S. minority sites or international settings. Amount awarded is based upon each applicant's research project and its associated costs. Funding can cover costs including but not limited to: transportation (e.g., plane, train, bus), living (e.g., rent, utility bills), medical expenses (e.g., vaccinations, required preventive medication), language training, and a stipend/allowance.

Previous internships have been conducted in Ghana, Tanzania, Uganda, Morocco, Malawi, Egypt, Kenya, Niger, Burkina Faso, Tunisia, Zambia, China, Cyprus, Peru, Mexico, and throughout minority populations in the U.S.

This program is funded by a research training grant from the National Cancer Institute.
