

Thread a string through the holes and pull the string tight. Make a double knot to hold the string in place.

Take the steel ring out of the hardware bag. On one end of the pouch, cut the string so that it is about 14 inches long. Tie the end of the string to the steel ring with a double knot so that it is ten inches from the end of the pouch to the knot on the ring.

Tie the other end of the string through the small hole in the arm and make a double knot to hold it in place. Make sure that the two strings are about the same length and cut off the extra string.
