## Reflections on “How Dirty Is Your School”

Directions: In paragraphs, reflects the following questions:

1. What are bacteria? Where can you find them?
2. How long does it take to grow bacteria?
3. Are they harmful or useful? To what extent? Explain and give examples.
4. How will you know the occurrence of bacterial growth? Give examples.
5. How can you prevent bacterial infections? Explain and give at least 5 ways of prevention.
6. If you had to repeat the experiments, what are your recommendations in terms of materials, time and space.

This image shows a full page of white paper with horizontal black lines. The lines are evenly spaced and run across the width of the page. There are four thicker lines that divide the page into five equal vertical sections, serving as guides for paragraphing or sectioning. The top and bottom margins are slightly larger than the others.
