Maps – Scales, Latitude, Longitude

Name: _____
Date: _____

Team #: _____

Scales:

1) Locate the two flags on your map. Estimate the distance between the two points using the provided scale on the bottom of the page (in meters).

2) Using a meter stick, go outside and actually measure the distance between the two flags.

3) What is the difference between the measurement you estimated on the map and the actual distance measured outside?

Latitude and Longitude:

- 1) Determine the latitude and longitude of point 1.

- 2) Determine the latitude and longitude of point 2.

- 3) Determine the latitude and longitude of point 3.
