

**Boston University Supplemental Retirement and Savings Plan and  
the Boston University Retirement Plan  
Investment Option Fact Sheet as of October 28, 2022**

**Vanguard Cash Reserves Federal Money Market Fund Admiral Shares**

**Ticker:** FMRXX

**Gross expense ratio:** 0.1% as of 12/17/2021

**Objective:** The investment seeks to provide current income while maintaining liquidity and stable share price of \$1.

**Strategy:** The fund invests primarily in high-quality, short-term money market instruments. Under normal circumstances, at least 80% of its assets are invested in securities issued by the U.S. government and its agencies and instrumentalities. The fund maintains a dollar-weighted average maturity of 60 days or less and a dollar-weighted average life of 120 days or less.

**Risk:** You could lose money by investing in a money market fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor has no legal obligation to provide financial support to money market funds and you should not expect that the sponsor will provide financial support to the fund at any time. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who has a low tolerance for investment risk and who wishes to keep the value of his or her investment relatively stable; Someone who is seeking to complement his or her bond and stock fund holdings in order to reach a particular asset allocation.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

Weighted average maturity (WAM) is the weighted average of all the maturities of the securities held in a fund. WAM for money market funds can be used as a measure of sensitivity to interest rate changes. Generally, the longer the maturity, the greater the sensitivity. WAM for money market funds is based on the dollar-weighted average length of time until principal payments must be paid, taking into account any call options exercised by the issuer and any permissible maturity shortening devices, such as demand features and interest rate resets. For bond funds, WAM can be used as a measure of sensitivity to the markets. Generally, the longer the maturity, the greater the sensitivity. The WAM calculation for bond funds excludes interest rate resets and only takes into account issuer call options if it is probable that the issuer of the instrument will take advantage of such options.

For money market funds, weighted average life (WAL) is the weighted average of the life of the securities held in a fund or portfolio, and can be used as a measure of sensitivity to changes in liquidity and/or credit

risk. Generally, the higher the value, the greater the sensitivity. WAL is based on the dollar-weighted average length of time until principal payments must be paid, taking into account any call options exercised by the issuer and any permissible maturity shortening features other than interest rate resets. For money market funds, the difference between weighted average maturity (WAM) and WAL is that WAM takes into account interest rate resets and WAL does not. WAL for money market funds is not the same as WAL of a mortgage- or asset-backed security.

#### **Expense Ratio Footnotes**

For a mutual fund, the expense ratio is the total annual fund or class operating expenses (before waivers or reimbursements) paid by the fund and stated as a percent of the fund's total net assets. Where the investment option is not a mutual fund, the figure displayed in the expense ratio field is intended to reflect similar information. However, it may have been calculated using methodologies that differ from those used for mutual funds. Mutual fund data has been drawn from the most recent prospectus. For non-mutual fund investment options, the information has been provided by the trustee or plan sponsor. When no ratio is shown for these options it is due to the fact that none was available. Nevertheless, there may be fees and expenses associated with the investment option.

**Before investing, consider the funds' investment objectives, risks, charges, and expenses. Contact Fidelity for a prospectus or, if available, a summary prospectus containing this information. Read it carefully.**
