

## Boston University STEM Majors (Spring 2025)

Department of Homeland Security F-1 regulations permit certain students completing a degree in an approved field of science, technology, engineering, and mathematics (STEM) to apply to USCIS for an extension of Optional Practical Training employment authorization if they meet all other STEM OPT eligibility requirements. The Student Exchange Visitor Program (SEVP) periodically updates a list of CIP1 codes they have determined to be eligible for the STEM OPT extension application. The following is a list of Boston University degree programs by major that currently qualify as STEM OPT eligible, along with their corresponding CIP codes. This list is intended to provide an overview and does not serve as an official list. Curriculum, codes and names of majors as well as the assigned CIP code change periodically, so F-1 students must refer to the specific CIP code on their I-20 immigration document to evaluate possible STEM OPT eligibility. The degree has to qualify for STEM at the time of program completion. If a program CIP code changes after student completes the program, they are not eligible for STEM OPT extension. Please contact your ISSO advisor with further questions.

College Code	BU Degree Program	Plan Code	CIP Code	CIP Code Description
