

Goals and Outputs

Among other things, the UNGA High-Level Meeting Political Declaration,

“30. Invite[d] the Quadripartite organizations to establish an independent panel for **evidence for action** against antimicrobial resistance in 2025 to facilitate the **generation and use** of multisectoral, scientific evidence to support Member States in efforts to tackle antimicrobial resistance, making use of existing resources and avoiding duplication of on-going efforts, after an open and transparent consultation with all Member States on its composition, mandate, scope, and deliverables”

Upstream Elements

- Governance Arrangements
- Mandate/Goals
- Stakeholder Engagement
- Resource Allocation

Downstream Elements

- Appropriate outputs
- Dissemination Strategies
- Communication Channels
- Monitoring and Evaluation

GOALS

TARGET AUDIENCE

OUTPUTS

IMPLEMENTATION PATHWAY

A few potential goals

- Awareness Enhancement: Raising awareness about AMR issues and promoting understanding among stakeholders.
- Evidence Clarification and Synthesis: Providing clear insights into the existing evidence base, identifying gaps, and bringing forward synthesized data.
- Evidence Generation: Producing new research and data to fill existing knowledge gaps
- Implementation Benchmarking: Informing countries to set globally agreed standards and targets and tracking how they implement them.
- Ambition Leveraging: Conducting horizon scanning and scenario modeling to drive greater ambition in tackling AMR.
- Capacity Building: strengthening countries capacity to develop and use relevant scientific evidence on AMR
- Other?

A few potential target audiences

- Governments
 - Key country platforms (G7, G20, assemblies of the Quadripartite organizations)
- Legislators
- Practitioners (health care professionals, farmers, etc)
- UN agencies
 - UN Secretary-General, FAO, WHO, WOAHA, UNEP
- Scientific community/researchers
- Public

A few potential outputs

- Assessments of scientific evidence
- Syntheses and evidence reviews
- Policy recommendations
- Methodologies
- Indicators
- Country profiles
- Case studies
- Other

Questions for discussion

1. What should the **goals** of the panel be?
2. What **upstream** and **downstream** elements are most likely to **support** — or **hinder**— the ability of an independent AMR panel to influence and catalyze policy change?
