

## Pardee School of Global Studies

The Frederick S. Pardee Center for the Study of the Longer-Range Future

### 2025 Graduate Summer Fellows Program

**Application deadline: Tuesday, March 25, 2025**

The Pardee Center Graduate Summer Fellows Program offers graduate students from across Boston University an opportunity for intensive interdisciplinary research and writing on topics aligned with the future-focused interests of BU's Frederick S. Pardee Center for the Study of the Longer-Range Future.

The Pardee Center conducts future-oriented, interdisciplinary, and policy-relevant research that can contribute to long-term improvements in the human condition. The Center is especially interested in rigorous analysis relating to longer-range human development. We encourage proposals for research that has the potential to identify actions that can be taken today to make our collective global tomorrow better.

The 10-week fellowship (May 27 – August 1, 2025) offers structured interaction with Pardee Center affiliated faculty and a collegial atmosphere that fosters peer support and intellectual growth. Graduate Summer Fellows conduct independent research and produce a substantive research paper to be considered for publication by the Pardee Center. Fellows are expected to participate fully in Pardee Center activities and Summer Fellows events for the duration of the 10-week program.

The program is open to Boston University graduate students from all Schools and Colleges. Master's students will receive a stipend of \$6,500. For PhD recipients in years one through five, this program will count as part of the five-year funding guarantee. Students completing degrees in May 2025 are not eligible.

Proposals for any topic related to the Pardee Center's longer-range global human development research mission will be considered. Research proposals that link directly to the student's own and/or BU faculty's ongoing research are especially desirable. Successful proposals will be interdisciplinary in nature with a clear sense of the topic's importance and policy relevance to the longer-range future. We are particularly interested in topics related to the great challenges of our time (such as, but not limited to, the future of human and sustainable development, democracy, public health, information and new media, social and economic inequities, technological and business innovation, climate change and environmental degradation, human and international security, etc.).

Successful proposals will clearly convey how the research is related to improving quality of life, especially of the most marginalized; clearly articulate how the research is relevant to the longer-range future; and explain why and how it can be completed in a 10-week period. Applications are encouraged from ALL fields, including the social and natural sciences, humanities, arts, business, public health, engineering, etc.

Applications should be submitted by email (as Word or PDF attachments) by **close of business on Tuesday, March 25, 2025**, to [gsfellow@bu.edu](mailto:gsfellow@bu.edu) with the subject line SUMMER FELLOWSHIP and your last name (e.g., SUMMER FELLOWSHIP JONES) and should include as separate, attached documents:

- Your CV
- 1,500-word (maximum) proposal for your research paper, including how the topic relates to the Pardee Center's research agenda and your own research interests. Please make sure your proposal has a title and page numbers.
- A 250-word abstract at the beginning of the proposal, written for a general, interdisciplinary audience (this is in addition to the 1,500 word limit)
- A copy of your unofficial transcript
- One letter of support from a Boston University faculty member familiar with your research proposal conception and goals. (The letter should be emailed directly from the faculty member to [gsfellow@bu.edu](mailto:gsfellow@bu.edu).)

Questions regarding the Summer Fellowship Program may be directed to [gsfellow@bu.edu](mailto:gsfellow@bu.edu). All candidates will be notified of the outcome of their application by late April.
