

Proposal Development Services

The Photonics Center is pleased to offer proposal development services to Photonics Center faculty members. The Photonics Center advises PIs and other faculty leads on responsiveness to federal and private funding solicitations, sponsor culture, best practices of proposal development and aspects of post-award project administration, and compliance matters from sponsor and University perspectives.

Support of Financial and Research Administration of Awarded Projects

Once projects are awarded, the Photonics Center provides program administration and support of financial and research administration. This includes administering block grants and supporting affiliated units, and managing training and research programs.
