

Meet the BICsters

AEMtec is an advanced packaging service provider for opto- and microelectronic products.

ADI nanoteamDHC is leveraging Nanotechnologies for the development of the next generation of Smart Diagnostic at the intelligent edge for Home and Point-of-Care applications.

Coalesenz

Timely coagulation management at the point-of-care.

Democratizing Precision Medicine for the Humanity.

Flexcon is committed to helping new technologies that will make the world a better place and improve human lives.

Leuko is an MIT spinout measuring white blood cells, using light, to improve cancer patient outcomes.

Innovative method to study the interactions of biological particles and molecules.

Meet the BICsters

Creating innovative, implantable neural interfaces that enable closed-loop sensing and stimulation in the brain for the treatment of neurological diseases.

nxtec

Intelligent Data Collaboration.

Nuceptive

Nuceptive leverages novel materials science for next generation contraception designed for pleasure and peace of mind.

PlenOptika makes technology that frees vision exams from the clinic, enabling vision professionals to reach billions worldwide to transform their lives and the economies of nations.

Building MRI surface coils that increase the speed of an MRI exam, improving patient throughput and enabling faster diagnostic imaging.

Building a fingerstick, near-patient diagnostic platform for the assessment of neurological and cardiovascular diseases.

THORLABS

Accelerating scientific discovery using a comprehensive portfolio of optical components for customers to create custom solutions.
