

Managing Emergencies Online Training

I. Introduction

An efficient emergency response relies on everyone doing their part. The entire BU community should be familiar with basic emergency response, initial actions to take, and who to notify. Managing Emergencies training is a highly interactive training and is broken down into 2 courses;

Managing Emergencies- This course pertains to everyone in the BU community. It discusses each type of emergency you may encounter. It covers initial actions, proper notifications, and other useful tools. Basic emergency response phases and actions are also outlined. There is a quiz at the end of the course that may be required at the discretion of your supervisor.

Managing Emergencies for Command Staff and Crisis Action Teams- This course is more specific in nature and is meant for those who actually serve a defined role in emergency response. This course discusses topics such as emergency command structure and specific roles and responsibilities. It also provides links to web sites, videos etc. that are very useful for emergency response teams
