

Submitting a Strain Information Form

Log in to quickorder.transnetyx.com, navigate to My Strains, then select "Create a New Strain."

Under "Strain Creation Options," select 'Submit Strain Information Form.'

Questions? We are here to help.

Reach out to our Genetic Solutions team via chat, email (help@transnetyx.com) or phone (+1 888 321 2113).

Submitting a Strain Information Form (continued)

Complete all required fields in Section 1 and choose at least one option for Additional Information in Section 2. In part two, please communicate all of the below information:

If the lines are made by CRISPR:

- The ssODN for models made by HDR must be included.
- Please confirm these lines are fully characterized, backcrossed to WT to rid mosaicism, and that samples are from the F2 generation or later. Without this confirmation, Transnetyx is not responsible for UD4 (In the Middle) results or designs that are not site-specific due to the donor template randomly integrating elsewhere.

If interested in zygosity, please note that in the detailed description text box.

Document requirements:

If documents are uploaded, we can only open files with no characters in the title (e.g. *, %, _). We can only accept .txt, .wordx, .gb, .gbk, .sbd, or .abi files. We cannot accept .sbp, .png, .jpeg, or .pdf sequence files.

Strain Information Form

1 Strain Details:
Assays made easy. Tell us about your strain below. * Indicates a required field

* Strain Name: * Species: * Tissue Type:

* Will you be crossing to another strain within the next 3 months? Yes No

* Please tell us about your current method of genotyping:

* Can your strain be found in a publicly available database (i.e. Jackson Labs, MGI, etc.)? Yes No

* Mouse Database:

* Database ID:

2 Additional Information:
One last step! At least 1 piece of information is required, but please check all that apply.
Note: An Assay Designer may be in contact if only minimal information is submitted.
You are currently impersonating "sevans@transnetyx.com". [Click here to stop.](#)

Detailed Description Enter detailed description here:

Primers: You may enter up to 4 primer sequences below:

#	Fwd. Primer Sequence	Rev. Primer Sequence	Band Size	Type
1	<input type="text"/>	<input type="text"/>	<input type="text" value="bp"/>	<input type="text" value="..."/>
2	<input type="text"/>	<input type="text"/>	<input type="text" value="bp"/>	<input type="text" value="..."/>
3	<input type="text"/>	<input type="text"/>	<input type="text" value="bp"/>	<input type="text" value="..."/>
4	<input type="text"/>	<input type="text"/>	<input type="text" value="bp"/>	<input type="text" value="..."/>
