

Coding without a computer science degree?

Are you seeking to land your first software-related job?

or

As a self-taught or boot camp graduate, have you been working in a software-related job for more than a year?

If so,

We hope you will...

Participate in our Study on Coders without a Computer Science Degree

We are currently in the process of conducting interviews with coders without a computer science degree about their journey of becoming software developers.

If you are **seeking your first software development job** or **have been working in one for more than a year**, we would like to hear about your experiences.

Participants will **take part in an interview for approx. 75 minutes**. At the end of the interview, as a way to thank you, we would like to give you a **\$10 Amazon gift card**.

Your participation is purely voluntary. If you agree to participate, you would be able to stop the interview at any time. Your data would remain completely confidential and would not be released in any way that could be linked to you.

If you are interested in participating in this study, please contact:

Dilan Eren
Sociology Ph.D. Candidate, Boston University
