	MPH: Epidemiology & Biostatistics	MS in Applied Biostatistics (MSAB)	MS in Biostatistics (MSB)	PhD in Biostatistics
Program Length (full-time)	1.5 – 2 years	1 year (two semesters plus summer internship)	15 months (three semesters)	4-5 years
Credits Course of Study	48 • 16 credits Public Health core	32 - 32 credits Biostatistics	32 8 credits Biostatistics	64 28 credits Biostatistics
	 8 credits Biostatistics 8 credits Epidemiology 16 elective credits MPH Bulletin EP/BS Bulletin	MSAB Bulletin	 12 credits Math & Statistics 4 credits Epidemiology 8 elective credits in Biostatistics, Epidemiology, and/or Math & Statistics MSB Bulletin	 20 credits Math & Statistics 4 credits Epidemiology 12 elective credits in Biostatistics, Epidemiology, and/or Math & Statistics PhD Bulletin
Program Emphasis	Broad foundation in public health	Practical application of biostatistics in professional contexts	Theoretical understanding and practical application of biostatistics	Theoretical understanding, practical application, and training in independent research in biostatistics
Practical Training	Practicum (240 hours)	 Professional development course Supervised research rotation (100 hours) Practical training/internship (400 hours) 	None required, possibility of teaching experience.	 Supervised research assistantships Teaching experience Required research presentations Completion of a dissertation equivalent to three publishable papers
Pre-requisites	■ Bachelor's degree	 Bachelor's degree 1 year of calculus including multivariable calculus One course (2 credits or more) in Linear Algebra to be completed before beginning of program 	 Bachelor's degree 1 year of calculus, including multivariate calculus One course in Linear Algebra 	 Bachelor's degree 1 year of calculus, including multivariate calculus One course in Linear Algebra
Application Deadline and	Deadline for fall admission: rolling. Priority deadline is <u>January 15</u> .	Deadline for fall admission: rolling. Priority deadline is <u>January 15</u> .	Deadline for fall admission: May 1 No spring admission.	Deadline for fall admission: <u>Dec. 1</u> No spring admission.

Career Fields	This program prepares students for a career in a variety of settings related to public health, including research settings, governmental agencies, health delivery systems, insurers, and pharmaceutical and biotechnology companies.	This program prepares students for a career as a biostatistician in biomedical research enterprises, pharmaceutical companies, contract research organizations, government and federal agencies.	This program prepares students for doctoral programs, or to function as collaborators on research projects in academia, biomedical research enterprises, pharmaceutical companies, contract research organizations, government and federal agencies.	This program prepares students for a career as a professional, academic, or industrial biostatistician in biomedical or epidemiologic sciences. Possible job titles include: Biostatistician, Professor
	Possible job titles include: Research/Data Manager or Analyst, Study Coordinator, Epidemiologist, Biostatistician, Public Health Officer, Consultant, and SAS Programmer.	Possible job titles include: Biostatistician, Data Analyst, Research Manager, SAS Programmer, Data Scientist	Possible job titles include: Biostatistician, Data Analyst, SAS Programmer, Data Scientist	of Biostatistics, Senior Data Scientist
