This panel will explore the long-tail health consequences of the COVID-19 pandemic. The experts will examine the social and economic changes that have emerged as a result of the COVID-19 pandemic and how these changes will shape population health in the coming years and decades.

Our Coronavirus Seminar Series addresses different aspects of the coronavirus pandemic, bringing together experts to discuss the causes and consequences of this global pandemic. The seminars aim to provide our community and the public with state-of-the-science information about the pandemic and its intersection with public health and keep us all connected to one another during this time.
