

FLM: Strategies for Analysis of Text

In-Class Activity

Online Implementation

You will be put in a break-out room with another student. With your partner, use some of the strategies and/or templates from this module to analyze an exhibit related to the course topic. You can collaboratively write your observations as a list of bullet points in a shared Google doc, or you can present your ideas in a more visual medium, like Padlet. Finally, be ready to share your analysis with the rest of the class - you can do so by either sharing your screen or sharing your Google doc/Padlet with others.
